why seneye?

Fortunately the days when pets were simply viewed as disposable objects are long gone. We continue to see positive steps in ethics and laws protecting animals. At seneye we believe that technology can be used to greatly reduce the number of animals lost in captivity and also help to educate.

Not only does a seneye device protect livestock it also reassures new and old aquarists they are providing optimal conditions for their fishy friends avoiding catastrophes which could lead to a quick exit from the hobby.

A seneye device monitors life critical parameters and delivers tailored advice when needed. It's time to make a stand and increase consumer success along with the survival rates of captive animals, fish and corals. So let's get analytical.

Come join the seneye revolution.

seneye HOME

New V2
Software

Seneye analyzes your water and alerts you if something is wrong; saving your fish from the devastating effects of new tank syndrome (NH3), harmful swings in pH or temperature. Great for new fish keepers as well as experts looking for extra peace of mind. Connect this USB device either directly to a PC or a seneye web server. Parameters are recorded and sent to the seneye cloud every 30 minutes which replace the need for constant testing.

benefits of seneye home

- Saves your investment in fish
- Works day and night to test your water
- SMS and e-mail alerts when things go wrong
- Records 1500 monthly readings of each parameter
- Full history and online graphs
- Aquarium advice and help
- Great technical support team

seneye POND

New V2
Software

The seneye pond has all the features of the seneye home plus a seneye float and an advanced dashboard making it perfect to monitor your pond. It can safe guard fish from the devastating effects of ammonia poisoning, as well as harmful swings in pH, temperature and water line. The seneye pond is recommended to protect any sized Koi pond and can be fitted in either the pond or the filter chamber.

benefits of seneye pond

- Saves your investment in koi and other fish
- Works day and night to test your water
- SMS and e-mail alerts when things go wrong
- Records 1500 monthly readings of each parameter
- Full history and online graphs
- Aquarium advice and help
- Great technical support team

seneye REEF

New V2
Software

All the features of the seneye home with the added bonus of an integrated PAR, LUX, spectrum and Kelvin meter. The extra light feature allows you to ensure that lighting conditions are optimal, encouraging corals and invertebrates to thrive. The seneye reef is also great for freshwater planted aquarium keepers ensuring that plants are getting the correct quantity and quality of light. Works with a PC running our software or with a seneye web server SWS.

benefits of seneye reef

- Saves your investment in fish, coral and invertebrates
- Works day and night to test your water
- SMS and e-mail alerts when things go wrong
- Records 1500 monthly tests of each parameter

works with
apple products

The seneye web server(SWS)enables any seneye device to run more efficiently and effectively. It allows people without a PC to use a seneye USB device and get their results direct on a smart phone, tablet, or computer.

There are two SWS versions. Both have an Ethernet port and one also has a Wi-Fi module. Once connected to your wireless internet router. Monitoring commences immediately, and you can the view the results anywhere in the world!

Web servers are also now available in packs with USB sensor devices. One is the seneye pond pack and the other is the seneye reef pack.

features

- Reliable connection to the seneye cloud
- Computer less operation
- Plug and play
- 4 x expansion ports
- Ethernet and Wi-Fi models

benefits

- Less down time and faster reactions
- Low power consumption
- Simple set up
- Ready for future add-ons
- Wi-Fi modules has 100m range

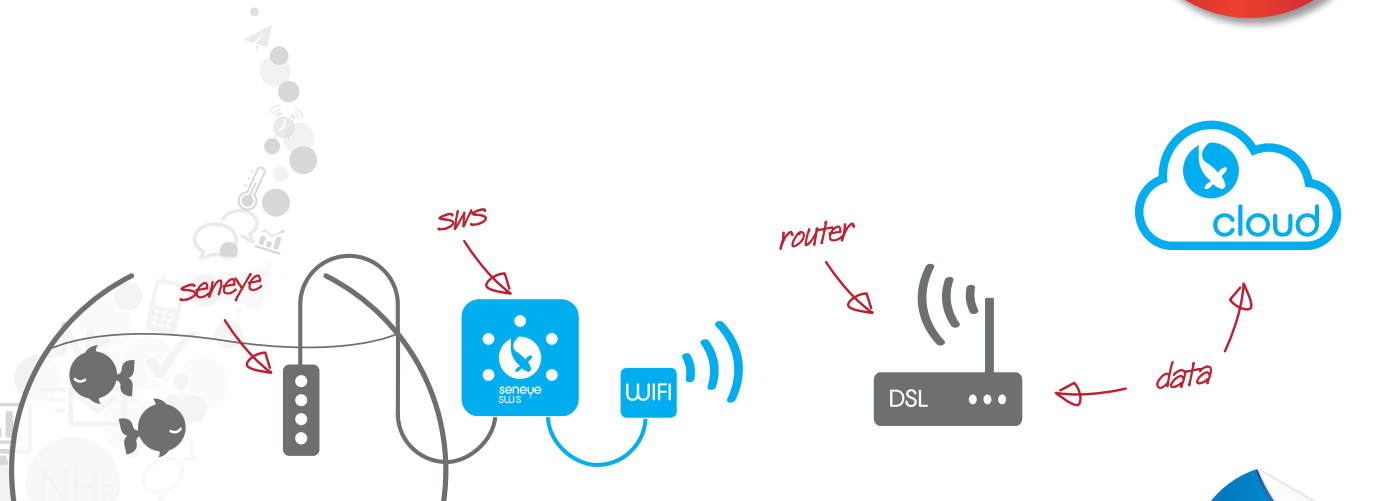

connects directly to the seneye cloud.

Works with all HTML5 enabled web devices.

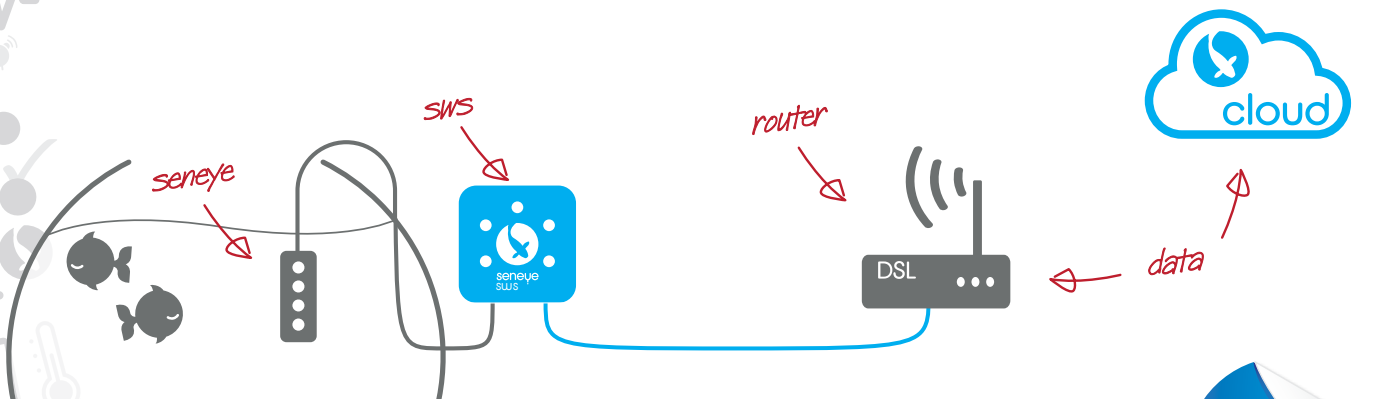

Package includes:

- seneye web server (SWS)
- power supply
- power cable 1 meter
- ethernet cable 1 meter
- Wi-Fi module (on Wi-Fi model)

seneye SLIDE

The only device to monitor free ammonia; the number 1 killer of fish!

- 1500 NH3 readings
 - 1500 pH readings
 - Alerts for NH3 and pH
 - Each slide lasts 30 days
- All other functions work without slide

There is no subscription and no contract with a seneye device.

The disposable seneye+ slide measures pH and NH3 and simply needs replacing each month for accurate and reliable readings. You can simply pay as you use.

seneye SLIDES

Seneye analyzes your water every 3 minutes and alerts you if something is wrong. The sensor slide protects your aquarium by monitoring the free ammonia and pH levels. Activating a new seneye slide every 30 days removes the need for time consuming and costly manual testing, or error ridden recalibrating. An active slide also enables the device to send out alerts via SMS along side the e-mail alerts.

Save your fish from the devastating effects of new tank syndrome and filter crashes as well as harmful swings in pH for just a few pence per day.

benefits of using a slide

- Saves your investment in fish and invertebrates
- Works day and night to test your water
- SMS when things go wrong
- Records 1500 monthly readings of pH and NH3
- No complex recalibrating
- Aquarium advice and help

seneye slide

- free ammonia (NH3)
- pH
- SMS Alerts

* all other functions work without a slide

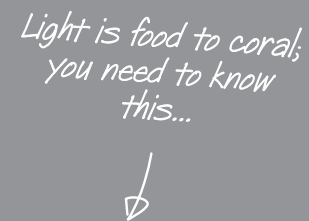

Keeping an active slide fitted means you get SMS alerts. On holiday with no data? Don't worry our SMS alerts are sent worldwide.

Package includes:

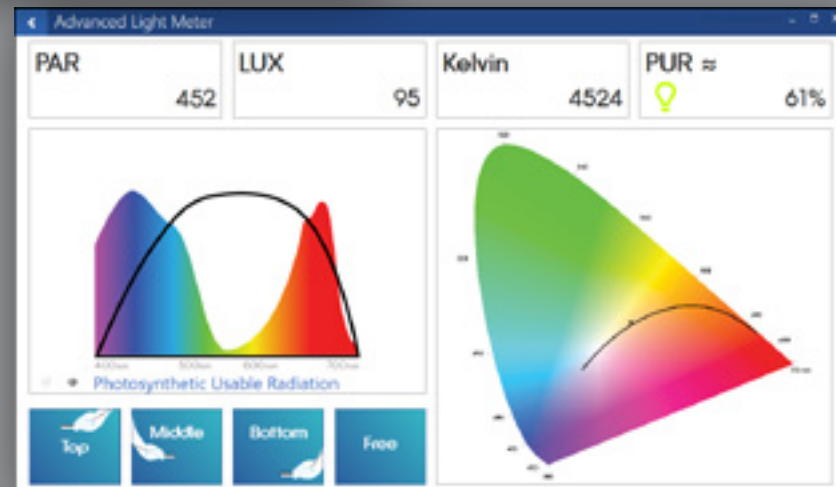

- 3x seneye pH & NH3 slides
- Postal mail packaging
- Or A7 size Point Of Sale (POS) pack

"Thanks for the quick reply.
Really good customer service
from seneye"

Thank you for excellent information,
Brought on Saturday and installed
working well. Many thanks

"I feel this Seneeye is one of the best things to happen to my fish since water."

Carmir

"MINE SAVED ME AFTER I FORGOT TO PLUG MY HEATER BACK IN AFTER A WATER CHANGE. WASN'T TILL HOURS LATER IN THE MIDDLE OF THE NIGHT BUT **IT SAVED MY AR\$E**. LOVE IT....."

I love my seneye reef and its a great product!!!

“fantastic product”

Thanks again for the quick response. Great product by the way.

"This is a great monitor that will probably be in most peoples equipment lists soon"

now i just need other big players in the marine world to listen to what us as consumers say.

**"Thanks for the fast
and efficient service!"**
James

I would not be without my seneye reef, great product with a great price

seneye FLORA

New
2016

2 part
balance with
no fillers

Seneye decided to look at plant fertilisers on the market when customers reported strange results their seneye devices picked up caused by plant fertiliser. We found that many had unneeded fillers and chemicals and that certain elements should be stored separately in 2 bottles. So seneye used an international team to develop the optimum plant fertiliser, flora. Its two part formula makes it the best possible plant fertiliser around and the results speak for themselves.

GROW YOUR BEST

- 2 part ensures stability
- no added colors or fillers
- Micro and Macro elements
- Easy action pump bottles
- Proven professional results

PACKAGE INCLUDES

- 1x 250ml Calcium Plus
- 1 x 250ml Nutrient Mix

Grown using seneye flora grown by George Farmer, UK.

seneye MAG HOLDER

New
2016

super strong
neo magnet
design

place any
seneye in
here

clamp between
glass or acrylic

All seneye devices provide an out of water SMS and e-mail alert as well as a back in water message. This magnetic holder allows for a more precise and reliable water line positioning in the tank or sump. Designed to be slim line on the outside of the tank we use only super strong neo magnets.

benefits of using a mag clip

- Ensures accurate postioning of device
- Works great with out of water line alerts
- Strong Neo magnets work through thick glass
- Allows device to be fully submersed
- Totally resin filled to ensure water tightness

Package includes:

- One magnetic inner holder
- Two outer magnetic fasteners

size 1 upto 6mm glass or acrylic
size 2 upto 10mm glass or acrylic
size 3 upto 16mm glass or acrylic

full catalogue

A seneye network over a large site couldn't be easier and more reliable. The advantage of a node is that neither wifi or power is needed at the point of installation and they come already preconfigured! Installed by our engineers or by yourself; there is no excuse not to keep your fish safe.

seneye DRi

simply place in container and clip lid up

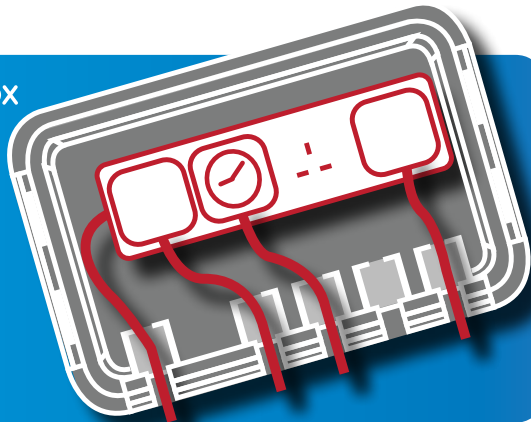

protect electronics from water near your pond or aquarium

keep it
DRi
IP55

The seneye DRi is ideal for keeping electrical connections and moisture sensitive equipment free from water damage. It is so simple to use just place your extension socket in the box, plug equipment in and place the lid on. Seneye DRi protects yourself and your livestock in those emergencies when a piece of equipment gives out and you need to get power to your tank. Simply place your extension socket in the box, plug equipment in and place the lid on!

benefits of DRi waterproof connection box

- Saves you from electric shocks
- Protects valuable equipment from water
- IP55 rated
- Hides plugs and timers
- No complex rewiring
- Tidy and safe

Keep your pets and family safe with this low cost solution.

Package includes:

- Main body with 5 cable entry points
- Lid with 360 degree seal
- Two detachable clips
- A5 size POS label

Safety
with no
rewiring

seneye CLEANER

This seneye cleaner replenishes an old and tired looking device to make it look and work like new. It is capable of removing even the hardest coralline algae as well as the hard mineral cake that can build up on kits. Using it is easy; just empty the non toxic crystals provided into a glass of water and place the device into the mixture. You will instantly see the cleaning power take place. Once cleaning has taken place, a 1 to 2 hours process depending on build up, simply rinse off. Your equipment will then be completely sterile; great for moving tanks while preventing transfer of fish disease.

benefits of using a seneye cleaner

- Saves your investment in equipment
- Restores performance
- Non toxic and gentle
- Great for sterilizing equipment
- Simple to use

Package includes:

- Full instructions
- Pair of disposable gloves
- Pot of seneye cleaner
- A7 size POS box

seneye

USB EXTENSION CABLE (2.5m)

ideal for indoor use

With this cable, you can connect your seneye device to your PC or power adaptor, up to 5m from your aquarium giving greater flexibility. Our quality cable is constructed to be 100% compliant with USB specifications and can also be used with any other USB device.

benefits of using an extension

- Doubles your seneyes reach
- Works with PC or power supply
- Strong connection
- Works with all USB 1 & 2 devices
- Hi-Speed data rated

Package includes:

- One 2.5 meter USB extension.
- A6 size POS box

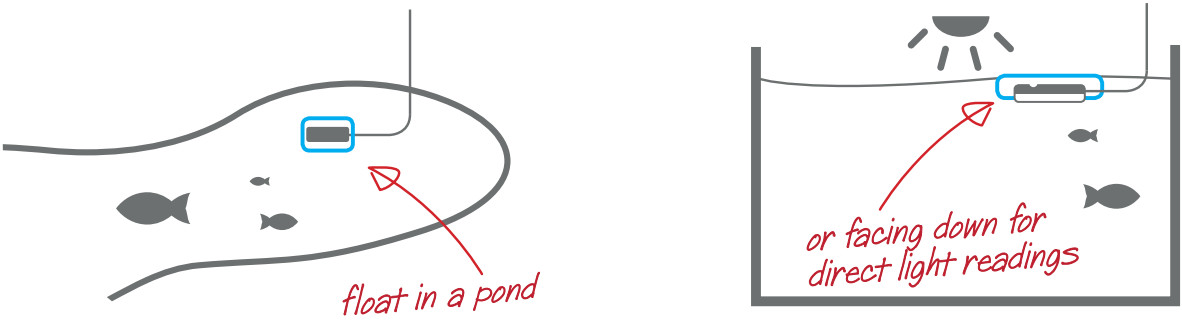

seneye

FLOAT

perfect for top down viewing in aquariums or ponds

This seneye float ensures that your seneye device will float in a pond, aquarium or sump, meaning you can look down on the device to see local alert lights. Alternatively, when used in an aquarium, the seneye device can be positioned in the float with the light sensor facing upwards allowing for constant direct light readings to be performed. The seneye float can also be used in an aquarium sump if you don't wish to see the seneye in your top tank.

benefits of using an float

- Works with all seneye devices
- Great for ponds and sumps
- Ideal for direct continuous light readings
- Durable material for long outdoor life

Package includes:

- seneye float
- A6 size POS box

seneye

POWER ADAPTOR

This seneye USB Power Adaptor is a compact full power adaptor that offers flexibility for customers who don't wish to have their seneye device constantly connected to a PC. When powered by the USB Power Adaptor readings are stored every hour and warning lights are displayed on the on the seneye device if the water parameters are toxic. Simply reconnect the seneye device to a PC, with the seneye connect application, and up to 30 days of stored readings are automatically uploaded into the seneye.me dashboard. This power supply can also be used with the seneye web server.

benefits of using a power adaptor

- Works with all seneye devices
- Allows for offline data to be collected.
- Requires no other connector or cable
- Works as a charger for most USB devices

Package includes:

- Power supply 5V / 750ma
- A7 size POS box

seneye

SLIDE SOAKER

The seneye slide soaker aims to make the process of wetting slides faster and more reliable. As with all pH test equipment, there is a wetting stage where air has to be replaced by water in the sensor. Until this has been done the slide will read low and therefore potentially give a false alert. There is also a risk that water removed from the aquarium for soaking may not remain the same as in the tank, again causing the potential for false readings when the slide is first fitted. Using the slide soaker will greatly reduce the chance for error and speed up the entire wetting process.

benefits of using a slide

- Slides wet faster
- Slides show more accurate values straight away
- Fit to the inside of tank via suction cup supplied
- Also floats so ideal for sumps
- Protects slide from light during wetting

Package includes:

- Suction cup
- Slide Soaker
- A7 size POS box

seneye

PARTS

The seneye device has only two detachable parts other than the slide. If these become lost or damaged, the unit would normally require replacement. However if you have a seneye parts pack, you can make your seneye whole again.

benefits of using seneye parts

- Allows your seneye to keep working
- Replaces lost or broken parts

Package includes:

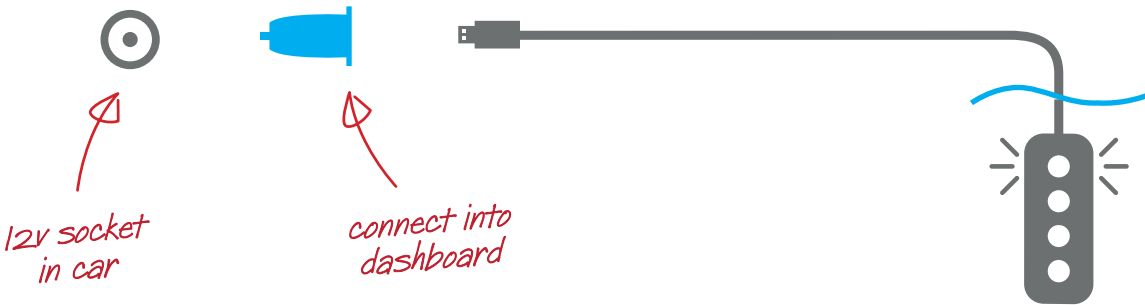

- seneye suction cup
- seneye USB back
- A7 size POS box

seneye

CAR POWER

NH3 is one of the most problematic chemicals when shipping large fish and having to stop every few hours to perform and log manual tests just prolongs travel time. This seneye USB car power adaptor is a way for people to transport fish without having to worry about stopping to test the water. All data is logged internally on the seneye and local warning lights are activated if there is a problem. The adaptor fits neatly in a standard 12v car charging socket. Its also suitable for charging other USB powered devices.

benefits of using car power

- Saves your investment in fish and coral
- Data is logged internally
- Device alerts when things go wrong
- Great for transporting large fish

Package includes:

- 1x car power adaptor
- A7 size POS box
